

I am concerned about the vote on the rule change. There has been no real public debate on this change and Powell has not listened to any bipartisan outside worries. Even when a bipartisan group of senators and representatives requested that the house and senate have more time to discuss this change, Powell did not grant it. The public input, opinion, and voice are what democracy is all about. One organization should not have the power to silence them. Please reconsider delaying the vote until there has been more public discussion and debate. Thank you  
Julianna
